SUMMARY

When I was 21, I climbed Mount Kalsubai. Not metaphorically, I literally climbed the highest mountain in Maharashtra. Now, I put that perseverance to work as a senior software developer for Digite Infotech. I don't have to climb any mountains, but I do have to move them and deliver solutions with top quality on time.

EXPERIENCE

Senior Software Engineer

Digite Infotech Pvt Limited

📅 09/2014 - 12/2018 📍 Mumbai

Builds web applications for Project Management Domain

- Design, build and maintain web applications, using authoring or scripting languages, content creation tools, management tools.
- Develop performance scripts and build the infrastructure using automation tools and shell scripting on cloud environment to test the application performance for tuning as well as load testing.
- Build web services and perform integration with various tools for a better end using experience with feature rich application.
- Perform or direct web application updates and installation on customer environments.
- Evaluate code to ensure that it is valid, is properly structured, meets industry standards and is compatible with browsers.
